

NAIL MAGAZINE FOR NAILING GUN

ABSTRACT OF THE DISCLOSURE

A nail magazine for alternatively accommodating T-nails or U-nails includes
5 a nail track and a stop block. The nailing track has a bottom notch and a first nail hole
upwardly extended from the bottom notch for holding a T-nail. The stop block is
positioned in the bottom notch of the nailing track and has a top side, a left side and a
right side, which define with a peripheral wall of the bottom notch of the nailing track
a second nail hole for holding a U-nail. The stop block further has a top cut groove
10 aligned with the first nail hole such that the T-nail held in the first nail hold is in
coincidence with an axis of a driving path that aligns with the second nail hole, thereby
enabling the T-nail to be positively and straightly be driven into a workpiece.
